Let Us into your **garden**

Stelmet S.A. jest producentem wyrobów z drewna przeznaczonych do grodzenia, wyposażania i dekoracji ogrodów, działek, tarasów, balkonów, parków, marketów oraz wszelkiego rodzaju przestrzeni rekreacyjnych.

Zagospodarowując teren zielony, nasi Klienci znajdą w naszej ofercie szeroki wachlarz wyrobów do zabudowy ogrodowej. Proponujemy ponad 800 wzorów wyrobów, które znajdują się w bieżącej produkcji.

Stelmet jest największym w Polsce i jednym z największych w Europie producentów drewnianej architektury ogrodowej - wyrobów przeznaczonych do grodzenia, wyposażenia i dekoracji ogrodów, parków, tarasów i innych przestrzeni o charakterze rekreacyjnym. Nasze główne zakłady produkcyjne znajdują się w Jeleniowie, Zielonej Górze, Lubięcinie oraz Kowarach. W trosce o jakość wyrobów, całość procesu produkcyjnego utrzymujemy w naszych rękach, począwszy od zakupu drewna, kończąc na pakowaniu.

Większość naszych produktów (między innymi płoty ekranowe, kratki, pergole i kwietniki, podesty oraz altany) trafia do rąk Klientów poza granicami Polski. Utrwalamy naszą silną pozycję na rynkach krajów Unii Europejskiej (m.in. francuskim, niemieckim, holenderskim, brytyjskim), Norwegii i Turcji. Aż 98% gotowych wyrobów trafia na eksport.

Na każdym etapie produkcji staramy się redukować do minimum negatywny wpływ naszej działalności na środowisko naturalne. Wykorzystujemy wyłącznie drewno posiadające certyfikat Forest Stewardship Council - oznacza to, że surowiec pochodzi z zasobów leśnych zarządzanych zgodnie z „Zasadami Dobrej Gospodarki Leśnej”. Jesteśmy dumni, mogąc oznaczać nasze wyroby znakiem FSC. Korzystamy z zamkniętego obiegu środków chemicznych służących impregnacji drewna oraz realizujemy kolejne etapy inwestycji ukierunkowanej na produkcję bezodpadową.

Stelmet S.A. is a manufacturer of wooden products designed for fencing, furnishing and decoration of gardens, garden plots, terraces, balconies, parks, markets and all kinds of recreation areas.

Those who develop green areas are offered a wide range of products designed for garden development. The clients may benefit from more than 800 product patterns available in the current production.

We take pride in being the largest in Poland and one of the largest European manufacturer of the wooden garden landscaping products designed for fencing, furnishing and decoration of gardens, parks, terraces and other recreation areas. Our main production plants are located in Jeleniów, Zielona Góra, Lubięcín and Kowary. By handling the entire production process ourselves, from the wood purchase to the packaging, we are able to offer top-quality products.

Most of our products (including panels, lattices, pergolas, planters, decking tiles and gazebos) are purchased by foreign customers. We reinforce our position on the European Union markets (including France, Germany, the Netherlands, the United Kingdom), Norway and Turkey. As much as 98% of our finished products are exported.

At every stage of the production process, we tend to minimize negative environmental impact of our activities. As we use only the wood certified by the Forest Stewardship Council, all the raw material comes from the forest resources managed according to the "Good Forestry Management Practices." We are proud to mark our products with the FSC label. Furthermore, chemical agents applied for wood preservation are used in a closed cycle, and we develop investments to achieve non-waste production.

---

Stelmet SA ist Hersteller von Holzzeugnissen zum Umzäunen sowie zur Einrichtung und Dekorierung von Gärten, Grundstücken, Terrassen, Balkonen, Parks, Märkten und jeglichen Erholungsanlagen.

Für die Einrichtung von Grünflächen bieten wir unseren Kunden eine reiche Palette von Erzeugnissen für Gartenbau an. Wir schlagen über 800 Produktmuster vor, die sich in unserer laufenden Produktion befinden.

Stelmet ist landesweit größter und einer der größten Hersteller der Gartenarchitektur aus Holz in Europa. Im Angebot gibt es Erzeugnisse zum Umzäunen und zur Einrichtung und Dekorierung von Gärten, Parks, Terrassen und anderen Erholungsanlagen. Unsere Hauptwerke befinden sich in Jeleniów, Zielona Góra, Lubięcín und Kowary. Den ganzen Produktionsprozess halten wir in unseren Händen, von der Holzbeschaffung bis zur Verpackung, wodurch die Qualität unserer Erzeugnisse auf stabil hohem Niveau bleibt.

Die meisten unserer Produkte (unter anderen Schirmzäune, Gitter, Laubengänge und Blumenständer, Podeste und Gartenlauben) werden ins Ausland geschickt. Wir verstärken unsere Position auf den Märkten der Europäischen Union (u. a. dem französischen, dem deutschen, dem niederländischen und dem britischen) sowie in Norwegen und der Türkei. Nicht weniger als 98% der Fertigprodukte werden exportiert.

In jeder Produktionsphase bemühen wir uns, den negativen Einfluss unserer Tätigkeit auf die Umwelt zu minimieren. Wir verwenden ausschließlich durch Forest Stewardship Council zertifiziertes Holz, was bedeutet, dass der Rohstoff aus den gemäß den „Regeln der Guten Forstwirtschaft“ verwalteten Waldressourcen stammt. Wir sind stolz darauf, dass wir unsere Produkte mit dem Zeichen FSC kennzeichnen können. Wir benutzen geschlossenen Kreislauf von Chemikalien für die Holzimprägnierung und realisieren weitere Schritte einer auf abfallfreie Produktion gerichteten Investition.

---

Stelmet S.A. est un fabricant des produits en bois, destinés à clôturer, équiper et décorer les jardins, parcelles de loisirs, terrasses, balcons, parcs, magasins et terrains de loisirs de tout type.

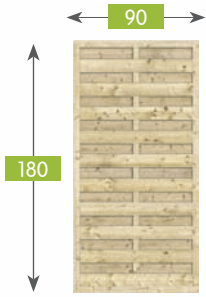

En aménageant leurs espaces verts, nos clients peuvent choisir parmi une gamme très large de produits d'aménagement de jardin. Plus de 800 modèles de produits sont offerts en permanence.

Stelmet est le plus grand fabricant polonais d'éléments en bois d'aménagement de jardin et un des plus grands d'Europe; nos produits sont destinés à clôturer, équiper et décorer les jardins, parcs, terrasses et d'autres terrains de loisirs. Nos sites de productions principaux sont situés à Jeleniów, Zielona Góra, Lubięcín et Kowary. Nous tenons beaucoup à la qualité de nos produits, c'est pourquoi le processus de production est réalisé en entier par nos propres soins: depuis l'achat du bois jusqu'au conditionnement des produits.

La plupart de nos produits (dont les panneaux de clôture, treillis, pergolas, jardinières, dalles et abris de jardin) sont expédiés aux clients étrangers. Nous consolidons notre forte présence sur les marchés des pays de l'Union Européenne (entre autres: France, Allemagne, Pays Bas, Grande Bretagne), de Norvège et Turquie. Jusqu'à 98% de nos produits finis sont destinés à l'exportation.

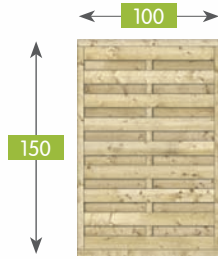

A chaque étape de la production, nous nous efforçons de minimaliser l'impact de nos activités sur l'environnement. Nous ne mettons en oeuvre que du bois certifié Forest Stewardship Council cela veut dire que la matière première provient des ressources forestières gérées conformément aux « Règles de bonne exploitation forestière ». Nous sommes fiers que nos produits puissent porter la marque FSC. Nous avons mis en place un circuit fermé de produits d'imprégnation du bois et nous réalisons les étapes successives d'un investissement orienté vers la production non-polluante.

Pellet / Le granulé de bois / Pellets

pellet

Firma Stelmet posiada zakład produkcji pelletu o mocach produkcyjnych 144 000 ton/rok, co czyni ją jednym z największych producentów pelletu w Europie.

Dzięki ciągłym inwestycjom firma rozwija się bardzo dynamicznie. Zakład powstał w oparciu o najnowsze na świecie technologie produkcji tego źródła energii.

Lokalizacja zakładu w sąsiedztwie Zakładu Produkcji Drewnianej Architektury Ogrodowej Stelmet S.A. w strefie ekonomicznej, pozwala na szybki i prosty transport surowca w pełni zamkniętym i kontrolowanym procesie, co daje gwarancję jego najwyższej jakości.

Pellet to nowoczesna, ekologiczna alternatywa tradycyjnych paliw stosowanych do ogrzewania domów mieszkalnych, pomieszczeń, budynków użyteczności publicznej (szkoły, przedszkola, szpitale itp.), zakładów produkcyjnych (piekarnie, cukiernie).  
Pellet z powodzeniem zastępuje: koks, węgiel i miął węglowy, gaz i olej opałowy.

Koncepcja efektywnego zagospodarowania i wykorzystania odpadów drzewnych do celów grzewczych pochodzi z krajów, gdzie tradycyjnie ceni się oszczędność, racjonalność inwestycji grzewczych i świadome działania proekologiczne. Najpowszechniej stosuje się pellet do celów grzewczych w Niemczech, Włoszech, Austrii i Danii.

Pellet, jako paliwo, zdobył uznanie ze względu na swoje bardzo mocne atuty użytkowe i handlowe:

- całkowite bezpieczeństwo w użytkowaniu, transporcie i składowaniu,
- wysoka wartość energetyczna (2 kg pelletu = 1 litr oleju opałowego),
- odporność na samozapłon,
- ekologiczne pochodzenie i brak zanieczyszczenia środowiska w procesie produkcji,
- niską emisję CO<sub>2</sub> podczas spalania,
- czystość, komfort i wygodę podczas transportu i stosowania,
- niskie koszty adaptacji urządzeń i kotłów grzewczych,
- łatwość i ekonomia stosowania (1 sezon grzewczy = 5-8 ton pelletu),
- z jednej tony pelletu, po jego spaleniu, pozostaje około 4 kg popiołu (naturalny nawóz).

Najwyższą jakość produktów spółki Stelmet potwierdzają i gwarantują niemieckie certyfikaty: DIN 51731 oraz DIN Plus.  
Pellet jest oferowany przez spółkę Stelmet w dwóch klasach: o nazwach handlowych LAVA i OLIMP.

---

Stelmet has a pellet production plant of the production capacity of 144 000 tons/year, which makes it one of the Europe's largest pellet manufacturers.

Thanks to constant investments, the company has been developing very dynamically. The plant has been established based on the world's state-of-the-art technologies in the field of production of this energy source.

The location of the plant in the proximity to Zakład Produkcji Drewnianej Architektury Ogrodowej Stelmet S.A. [Wooden Garden Architecture Production Plant Stelmet, Joint Stock Company] in the economic zone, allows for quick and easy transport of the raw material under a fully closed and controlled process, thus guaranteeing its highest quality.

Pellet is a modern, ecological alternative to traditional fuels used for heating of houses, enclosed spaces, production plants (bakeries, cake shops.)  
Pellet is an excellent substitute for coke, coal and fine coal, gas as well as heating oil.

The concept of effective management and use of wood waste for the heating purposes originates from the countries, which, by tradition, value economy and rationality of heating investments and conscious environment-friendly activities. Pellet is most widely used for heating purposes in Germany, Italy, Austria and Denmark.

As a fuel, pellet is recognized for its great functional and commercial advantages:

- absolute safety as far as use, transport and storage is concerned;
- high calorific value (2 kg of pellet = 1 litre of heating oil);
- self-ignition resistance;
- environmentally-friendly origin and a production process free of any environment pollution;
- low CO<sub>2</sub> emission in the combustion process;
- clean, comfortable and convenient transport and use;
- low adaptation costs of heating equipment and boilers;
- ease and economy of use (1 heating season = 5-8 tons of pellet);
- combustion of 1 ton of pellets yields about 4 kg of ash (natural manure).

The top quality of Stelmet products is confirmed and guaranteed by the German quality certificates: DIN 51731 and DIN Plus.  
There are two classes of Stelmet pellet branded LAVA Pellet and OLIMP Pellet, respectively.

pellet

La société Stelmet dispose d'une usine de production de granulé de bois, à une capacité de production de 144.000 tonnes par an, ce qui la place parmi les plus grands fabricants de granulé en Europe.

Grâce aux investissements continus, l'entreprise connaît une évolution dynamique, et la technologie de production de cette source d'énergie mise en oeuvre par l'usine est une des plus récentes du monde.

La localisation géographique de l'usine à proximité du site de production d'éléments en bois d'aménagement de jardin Stelmet S.A. dans une zone économique, permet de transporter la matière première de façon simple et rapide et la mettre en oeuvre dans un processus de transformation entièrement fermé et contrôlé, ce qui garantit la meilleure qualité du produit.

Le granulé de bois est une alternative moderne et écologique aux combustibles traditionnels utilisés pour le chauffage des maisons, locaux et sites de production (boulangeries, pâtisseries). Le granulé se substitue parfaitement à: coke, charbon, fines de charbon, gaz et fioul.

L'idée de traiter et utiliser de manière efficace les déchets de bois pour les besoins de chauffage vient des pays où l'économie, l'optimisation des investissements de chauffage et les comportements pro-écologiques sont traditionnellement appréciés. Le granulé de bois est le plus populaire en tant que combustible de chauffage en Allemagne, Italie, Autriche et au Danemark.

Le granulé de bois est reconnu pour ses avantages commerciaux et d'utilisation suivants:

- utilisation, transport et stockage en toute sécurité,
- pouvoir calorifique élevé (2 kg de granulé = 1 litre de fioul),
- résistance à l'inflammation,
- provenance écologique et le processus de production non-polluant,
- basses émissions de CO2 lors de la combustion,
- propreté et confort lors du transport et utilisation,
- coûts bas d'adaptation des appareils et chaudières de chauffage,
- facilité et économie d'utilisation (1 saison de chauffe = 5-8 tonnes de granulé),
- une tonne de granulé traité donne 4 kg environ de cendres restants (engrais organique).

La plus haute qualité des produits de la société Stelmet est confirmée et garantie par les certificats de qualité allemands: DIN 51731 et DIN Plus. La société Stelmet propose le granulé en deux classes, commercialisées sous les marques LAVA Pellet et OLIMP Pellet.

---

Firma Stelmet besitzt ein Werk für die Herstellung von Holzpellets mit Produktionskapazitäten von 144.000 Tonnen/Jahr, wodurch sie einer der größten Pellethersteller Europas ist.

Durch ständige Investitionen entwickelt sich die Firma sehr dynamisch. Das Werk ist aufgrund der weltweit modernsten Produktionstechniken dieser Energiequelle entstanden.

Die Lokalisierung des Werkes in der Nachbarschaft der Zakład Produkcji Drewnianej Architektury Ogrodowej Stelmet SA, in der Wirtschaftszone, ermöglicht schnellen und einfachen Rohstofftransport in einem voll geschlossenen und kontrollierten Prozess, was die höchste Qualität gewährleistet.

Pellets stellen eine moderne, umweltfreundliche Alternative für herkömmliche Brennstoffe zur Beheizung von Wohnhäusern, Räumen und Produktionsbetrieben (Bäckereien, Konditoreien) dar. Die Pellets ersetzen erfolgreich Koks, Kohle und Feinkohle, Gas und Heizöl.

Das Konzept der effektiven Nutzung und Verwertung von Holzabfällen für Heizzwecke stammt aus Ländern, in denen Sparsamkeit, Rationalität von Heizinvestitionen und bewusste umweltschutzfördernde Maßnahmen traditionell geschätzt werden. Die Pellets werden für Heizzwecke am meisten in Deutschland, Italien, Österreich und Dänemark eingesetzt.

Pellets als Brennstoff haben Anerkennung wegen ihrer hohen Nutz- und Handelswerte erlangt:

- Vollständige Sicherheit bei der Nutzung, Transport und Lagerung,
- Hoher Heizwert (2 kg Pellets = 1 Liter Heizöl),
- Beständigkeit gegen Selbstzündung,
- Ökologische Herkunftsquelle und keine Umweltverschmutzung im Produktionsprozess,
- Niedrige CO2-Emissionen bei der Verbrennung,
- Sauberkeit, komfortabler Transport und Einsatz,
- Niedrige Kosten für die Anpassung von Heizanlagen und -kesseln,
- Leichter und wirtschaftlicher Einsatz (1 Heizsaison = 5-8 Tonnen Pellets),
- Aus einer Tonne Pellets bleiben infolge des Verbrennungsprozesses ca. 4 kg Asche übrig (natürlicher Dünger).

Die höchste Produktqualität der Gesellschaft Stelmet bescheinigen und garantierten die deutschen Qualitätszertifikate nach DIN 51731 und DIN Plus. Die Pellets werden durch Stelmet in zwei Klassen hergestellt: mit Handelsnamen LAVA Pellet und OLIMP Pellet.

## Produkt wysokiej jakości.

Gwarancją jakości LAVA Pellet jest wykorzystanie w procesie produkcyjnym własnego, ustandaryzowanego surowca - trocin z drzew iglastych (jedynie sosna i świerk). Spółka Stelmet sprawuje pełną kontrolę nad jakością i składem surowca. Specjalny proces technologiczny (niska temperatura suszenia) i jednolitość surowca powodują, że wyprodukowany pellet charakteryzuje się, oczekiwaną przez użytkowników, jasną barwą.

- Niska zawartość popiołu.
- Wysoka kaloryczność.
- Niska zawartość wilgoci.
- Wysoka gęstość.
- Bardzo niska zawartość w spalinach dwutlenku siarki i innych szkodliwych substancji.
- Dostępny w wersji 6mm i 8mm.

Pellet LAVA oferowany jest w workach wielkości:

- 15kg,
  - 1 tona - tzw. Big bag.
- 

## High quality product.

By using only own, standardized raw material – sawdust from coniferous trees (only pine and spruce) – for the production process the quality of LAVA Pellet is guaranteed. Stelmet maintains an absolute control over the quality and composition of the raw material. A special technological process (low temperature of drying) and homogeneity of the raw material make the manufactured pellet distinguish by bright colour expected by the users.

- Low ash content.
- High calorific value.
- Low moisture content.
- High density.
- Very low content of sulfur dioxide and other harmful substances in the combustion gas.
- Available in 6 mm and 8 mm versions.

Pellet LAVA is offered in the bags of:

- 15 kg,
  - 1 ton – the so-called Big bag.
- 

## Produit de qualité.

La qualité du LAVA Pellet est garantie par la mise en oeuvre dans le processus de production de sa propre matière première standardisée – copeaux de résineux (pin et épicéa uniquement). La société Stelmet assure un contrôle total de la qualité et composition de la matière première. Grâce à un procédé technologique spécifique (basse température de séchage) et une homogénéité de la matière première, le granulé fabriqué se caractérise par une couleur claire que les utilisateurs apprécient.

- Basse teneur en cendres.
- Pouvoir calorifique élevé.
- Basse teneur en humidité.
- Haute densité.
- Très basse teneur en dioxyde de soufre et en d'autres substances nuisibles dans les gaz de combustion.
- Disponible en calibre 6 mm et 8 mm.

Le granulé LAVA est emballé dans les sacs de:

- 15 kg,
  - 1 tonne – un « Big bag ».
- 

## Hochwertiges Produkt.

Für die Qualitätsgarantie von LAVA Pellet steht die Nutzung des eigenen standardisierten Rohstoffs im Produktionsprozess - Sägespäne der Nadlbäume (Kiefer und Fichte). Die Gesellschaft Stelmet übt volle Qualitäts- und Rohstofflagerkontrolle aus. Der spezielle technologische Prozess (niedrige Trocknungstemperatur) und die Einheitlichkeit des Rohstoffs tragen dazu bei, dass sich die hergestellten Pellets durch einen von Benutzern erwarteten hellen Farbton auszeichnen.

- Niedriger Gehalt der Asche.
- Hoher Heizwert.
- Niedriger Feuchtigkeitsanteil.
- Hohe Dichte.
- Sehr niedriger Anteil von Schwefeldioxid und anderen Schadstoffen in Abgasen.
- Erhältlich in Größe 6 mm und 8 mm.

Die LAVA-Pellets sind in folgenden Säcken angeboten:

- 15 kg,
- 1 Tonne - sog. Big-Bags

Stelmet

OLIMP pellet

## Produkt najwyższej jakości.

Nowoczesne, ekologiczne paliwo OLIMP Pellet stosowane jest przez wymagających odbiorców do ogrzewania domów, pomieszczeń mieszkalnych, zakładów produkcyjnych - zwłaszcza zlokalizowanych w centrach miast i specjalnych strefach ochronnych. Z powodzeniem zastępuje: koks, węgiel i miad węglowy, gaz i olej opałowy. Produkt jest wyjątkowo wygodny w stosowaniu przez użytkownika oraz przyjazny dla środowiska zapewniając komfort sąsiedztwu i otoczeniu.

- Pierwszy pellet w Polsce spełniający normę DINplus, gwarantujący podwyższone parametry jakościowe.
- Bardzo niska zawartość popiołu.
- Wysoka kaloryczność.
- Zwiększona odporność na kruszenie dzięki wysokim parametrom mechanicznym pelletu.
- Wysoka gęstość.
- Bardzo niska zawartość w spalinach dwutlenku siarki i innych szkodliwych substancji.
- Dostępny w wersji 6 mm.

Pellet Olimp oferowany jest w workach wielkości:

- 15kg,

- 

## Top quality product.

OLIMP Pellet, a modern, ecological fuel, is used by demanding consumers for heating houses, enclosed spaces and production plants, especially these located in the city centres and special protection zones. It is an excellent substitute for coke, coal and fine coal, gas as well as heating oil. Easy-to-use and environmentally friendly, the product is comfortable to the neighbourhood and the surroundings.

- The first pellet in Poland meeting the requirements of the DINplus standard, which guarantees higher quality parameters.
- Very low ash content.
- High calorific value.
- Increased thanks to high mechanical parameters of the pellet.
- High density.
- Very low content of sulfur dioxide and other harmful substances in the combustion gas.
- Available in 6 mm version.

Pellet Olimp is offered in the bags of:

- 15 kg;
  - 1 ton – the so-called Big bag.
- 

## Produit de la meilleure qualité.

Un combustible moderne et écologique OLIMP Pellet est utilisé par les clients exigeants pour le chauffage des maisons, espaces habitables et sites de production, notamment ceux localisés aux centres des villes et dans les zones de protection spéciales. Il se substitue parfaitement à: coke, charbon, fines de charbon, gaz et fioul. C'est un produit extrêmement facile à utiliser et écologique qui assure un confort pour l'entourage.

- Le premier granulé de bois en Pologne qui répond aux exigences de qualité plus élevées de la norme DINplus.
- Très basse teneur en cendres.
- Pouvoir calorifique élevé.
- Résistance renforcée au broyage grâce à des caractéristiques mécaniques élevées du granulé.
- Haute densité.
- Très basse teneur en dioxyde de soufre et en d'autres substances nuisibles dans les gaz de combustion.
- Disponible en calibre 6 mm.

Le granulé Olimp est emballé dans les sacs de:

- 15 kg,
  - 1 tonne – un « Big bag ».
- 

## Produkt höchster Qualität.

Der moderne ökologische Brennstoff - OLIMP Pellet - wird durch anspruchsvolle Kunden zur Beheizung von Häusern, Wohnräumen, Produktionsbetrieben, insbesondere in den Stadtzentren und speziellen Schutzzonen, eingesetzt. Der Brennstoff ersetzt erfolgreich Koks, Kohle und Feinkohle, Gas und Heizöl. Das Produkt ist sehr komfortabel für den Einsatz durch den Benutzer und umweltfreundlich, was der Nachbarschaft und der Umgebung Komfort bietet.

- Die ersten Pellets in Polen, die den Anforderungen der DINplus entsprechen, die höhere Qualitätsparameter garantieren.
- Sehr niedriger Gehalt der Asche.
- Hoher Heizwert.
- Erhöhte Bröckelfestigkeit durch hohe mechanische Parameter der Pellets.
- Hohe Dichte.
- Sehr niedriger Anteil von Schwefeldioxid und anderen Schadstoffen in Abgasen.
- Erhältlich in Größe 6 mm.

Die Olimp-Pellets werden in folgenden Säcken angeboten:

- 15 kg,
- 1 Tonne - sog. Bigbags.
